Python String Slicing Test

50 Multiple-Choice Questions • Questions Only • No Answer Key

Name: _____ **Date:** _____

Instructions: Predict the output of each Python code snippet and select one option.

1. What is the output?

```
s = "Hello World"
print(s[0:5])
```

A. Hello
B. Hello
C. ello
D. World

2. What is the output?

```
s = "Hello World"
print(s[6:])
```

A. World
B. World
C. Worl
D. d

3. What is the output?

```
s = "Hello World"
print(s[:5])
```

A. Hello
B. Hello
C. ello
D. H

4. What is the output?

```
s = "Hello World"
print(s[::2])
```

A. HloWrd
B. Hlo ol
C. HloWrd
D. Hello World

5. What is the output?

```
s = "Hello World"
print(s[::-1])
```

A. dlroW olleH
B. Hello World
C. dlroWolleH
D. World Hello

6. What is the output?

```
s = "Hello World"
print(s[-5:])
```

A. World
B. World
C. o Wor
D. Hello

7. What is the output?

```
s = "Hello World"
print(s[-5:-2])
```

A. Wor
B. Worl
C. orl
D. rld

8. What is the output?

```
s = "Hello World"
print(s[10:5:-1])
```

A. dlroW
B. dlro
C. World
D. dlroW

9. What is the output?

```
s = "Hello World"
print(s[1:9:2])
```

A. el o
B. elW
C. el o
D. elWl

10. What is the output?

```
s = "Hello World"
print(s[8:2:-2])
```

A. rWl
B. roH
C. rWl
D. roW

11. What is the output?

```
s = "Python Programming"
print(s[:6])
```

A. Python
B. Python
C. Pytho
D. Programming

12. What is the output?

```
s = "Python Programming"
print(s[7:])
```

A. Programming
B. Programming
C. rogramming
D. P

13. What is the output?

```
s = "Python Programming"
print(s[::3])
```

A. Ph oai
B. Ph oai
C. Pto rg
D. PynPorm

14. What is the output?

```
s = "Python Programming"
print(s[::-2])
```

A. gimro ntP
B. gimro noP
C. gnimmargorP
D. gimr ohtyP

15. What is the output?

```
s = "Python Programming"
print(s[7:13])
```

A. Progra
B. Progr
C. Program
D. rogram

16. What is the output?

```
s = "Python Programming"
print(s[-11:-1:2])
```

A. Pormi
B. Pormn
C. Program
D. Pormin

17. What is the output?

```
s = "Python Programming"
print(s[12:6:-1])
```

A. argorP
B. argor
C. argorP
D. Program

18. What is the output?

```
s = "Python Programming"
print(s[3:10:2])
```

A. hnPo
B. h r
C. hno
D. hnP

19. What is the output?

```
s = "Python Programming"
print(s[-1:-8:-2])
```

A. gmm
B. gnr
C. gmr
D. gna

20. What is the output?

```
s = "Python Programming"
print(s[5:5])
```

A. Python
B. An empty string
C. n
D. Error

21. What is the output?

```
s = "Programming"
print(s[3:8])
```

A. gramm
B. gram
C. grammi
D. ogram

22. What is the output?

```
s = "Programming"
print(s[-8:-3])
```

A. gramm
B. ogram
C. gram
D. rammi

23. What is the output?

```
s = "Programming"
print(s[8:2:-1])
```

A. margor
B. margorP
C. marg
D. margor

24. What is the output?

```
s = "Programming"
print(s[::-3])
```

A. grr
B. gmrr
C. gnim
D. gmr

25. What is the output?

```
s = "Programming"
print(s[1:10:3])
```

A. rrm
B. rga
C. rmi
D. rgn

26. What is the output?

```
s = "abcdefghij"
print(s[2:9:2])
```

A. cegi
B. c e g i
C. cdefghi
D. dfhj

27. What is the output?

```
s = "abcdefghij"
print(s[8:1:-3])
```

A. ifc
B. igc
C. ihg
D. ihd

28. What is the output?

```
s = "abcdefghij"
print(s[-2:-9:-2])
```

A. igec
B. jhfdb
C. igdb
D. ihgc

29. What is the output?

```
s = "abcdefghij"
print(s[7::-2])
```

A. hfdb
B. hfd
C. hgec
D. geca

30. What is the output?

```
s = "abcdefghij"
print(s[-1::-3])
```

A. jgda
B. jheb
C. jgd
D. jfc

31. What is the output?

```
s = "Hello World"
print(s[7:2:-2])
```

A. o l
B. oWl
C. olH
D. rWl

32. What is the output?

```
s = "Hello World"
print(s[-2:-10:-2])
```

A. lo l
B. lWle
C. dlro
D. lWol

33. What is the output?

```
s = "Hello World"
print(s[2:-2])
```

A. llo Wor
B. llo W
C. llo Wor
D. llo Worl

34. What is the output?

```
s = "Hello World"
print(s[-1:3:-1])
```

A. dlroW o
B. dlroW
C. dlroW ol
D. dlroW olle

35. What is the output?

```
s = "Hello World"
print(s[1:10:3])
```

A. eoo
B. elW
C. eol
D. eow

36. What is the output?

```
s = "Data Science"
print(s[5:1:-1])
```

A. S at
B. Sata
C. S at
D. ataS

37. What is the output?

```
s = "Data Science"
print(s[-1:-7:-2])
```

A. eci
B. e c
C. eic
D. ecS

38. What is the output?

```
s = "Data Science"
print(s[::-3])
```

A. ecnD
B. eicD
C. eicD
D. ecD

39. What is the output?

```
s = "Data Science"
print(s[2:11:2])
```

A. tSine
B. taSine
C. t cec
D. tSien

40. What is the output?

```
s = "Data Science"
print(s[10:2:-2])
```

A. en iS
B. n e
C. nS t
D. nei

41. What is the output?

```
s = "abcdef"
print(s[100:])
```

A. abcdef
B. f
C. An empty string
D. Error

42. What is the output?

```
s = "abcdef"
print(s[-100:3])
```

A. abc
B. bcd
C. abcd
D. Error

43. What is the output?

```
s = "abcdef"
print(s[4:100])
```

A. ef
B. f
C. efg
D. Error

44. What is the output?

```
s = "abcdef"
print(s[1:5:-1])
```

A. edc
B. An empty string
C. bcde
D. Error

45. What is the output?

```
s = "abcdef"
print(s[-2:1:-2])
```

A. ec
B. ed
C. ecb
D. dc

46. What is the output?

```
s = "abcdef"
print(s[4::-2])
```

A. eca
B. edb
C. eca
D. fdb

47. What is the output?

```
s = "abcdef"
print(s[::-4])
```

A. fb
B. fc
C. fe
D. fd

48. What is the output?

```
s = "abcdefgh"
print(s[6:1:-2])
```

A. gec
B. g e c
C. ged
D. gfc

49. What is the output?

```
s = "abcdefgh"
print(s[-2:0:-3])
```

A. gd
B. ge
C. gdb
D. gda

50. What is the output?

```
s = "Hello World"
print(s[::-2][1:4])
```

A. lWo
B. loW
C. olW
D. lro
